Art Unit: 1633

1. Applicant's election of group I, claims 18-24 and 26, in Paper No. 11 is acknowledged. Applicants' amendment filed 10-25-02 have been entered. Claims 18, 22 and 37 have been amended. Claims 40-43 have been added.

It should be noted that the phrase "and VIII-XI" in the preceding Official action mailed 10-2-02 (Paper No. 8) is a typographical error.

Upon further consideration of the elected claims 18-24 and 26 and newly added claims 40-43, further restriction is required.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-22 and 40-43, drawn to an antibody specific to MASP-2 polypeptide, and a pharmaceutical composition comprising said antibody, classified in class 424, subclass 130.1.
- II. Claims 23, 24 and 26, drawn to a method for detecting the presence of MASP-2 polypeptide in a sample by using specific binding partner, such as an antibody, classified in class 435, subclass 7.1.

3. The inventions are distinct, each from the other because of the following reasons:

Groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MEP. § 806.05(h)).

In the instant case the product is the antibody specific to MASP-2 polypeptide. The antibody can

Art Unit: 1633

be used to purify protein by using affinity column chromatography, which is different from detecting MASP-2 polypeptide in a biological sample.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
